+ SUMMARY

Passionate and compassionate software developer with a keen eye for aesthetics and a background as a Graphic Designer. Excels in writing clean, well-tested, and maintainable code while prioritizing deadlines and requirements. Collaborative team player with strong communication skills, focused on delivering exceptional frontend solutions. Driven by my passion for frontend development, I continuously seek opportunities to learn and stay up-to-date with the latest technologies. Adaptable and quick to learn, I leverage new tools and frameworks to create innovative and user-friendly web experiences. As a dedicated professional, I am eager to join a high-performing product team where I can apply my design skills and technical expertise to tackle challenges and create positive impacts for end users. With a compassionate and confident approach, I am committed to collaborating effectively and continuously improving my craft.

+ PROJECTS

COMMUNITY GARDEN MANAGEMENT APP

May 2023 to July 2023

The Community Garden Management App is a innovative and socially impactful platform designed to foster a sense of community and promote local sourcing of food. This app aims to bring neighborhoods closer together through the joy of gardening.

- Java with Springboot Framework: Used for the backend development, providing a robust and streamlined development experience.
- MySQL with Spring Security: Employed for data storage and secure authentication and authorization of users. Prepared statements and input validation are used to prevent SQL injection attacks.
- JSPs with Spring MVC, CSS, Bootstrap, and Tailwind: Rendered front-end view pages, maintaining a clear separation of data and application logic. Styled the user interface for an attractive and responsive design.
- JavaScript, Ajax, Full Calendar Plugin: Implemented interactivity and dynamic behavior on the client-side. Enabled asynchronous communication with the backend for seamless data retrieval. Utilized for visually displaying and managing events on a calendar for garden managers.
- Agile Development Process: Followed to ensure iterative and customer-centric development.

+ EMPLOYMENT

FREELANCE

Digital Visual Designer

Remote
Feb. 2020 to Dec. 2022

- As a freelance graphic designer, I leveraged my expertise in Adobe Creative Cloud to deliver visually engaging content that expanded clients' social reach and customer acquisition by up to 50%.
- By employing advanced retouching, manipulation, and reconstruction techniques using Photoshop and Capture One, I skillfully enhanced brand imaging while staying true to each client's unique identity. This strategic approach resulted in remarkable audience engagement across various social platforms, generating an impressive daily impression count ranging from 100,000 to 300,000. This increased visibility and engagement directly translated into a wider customer base and higher brand recognition.
- My experience in organized file management and strategic timeline planning ensured seamless collaboration with clients, enabling the consistent delivery of high-quality design deliverables. This not only showcased my ability to understand and fulfill customer needs but also highlighted my aptitude for meeting urgent production demands.
- The outstanding client retention rate, with 7 out of 10 clients returning for services, was a testament to the consistently high-quality deliverables I provided. My meticulous attention to detail throughout the design process, coupled with prompt invoice management and secure organization of project files, resulted in an efficient and reliable service that offered clients a rewarding experience.
- In addition to successfully amplifying clients' online presence, my efforts generated earnings exceeding \$50,000. This achievement further underscores my proficiency in digital content creation and my eagerness to utilize these skills to contribute to the development of user-centered web experiences in the next generation.
- By incorporating my experience with social media campaigns, word-of-mouth referrals, and a track record of delivering high-quality work that led to customer acquisition and retention, my expertise in graphic design principles can seamlessly transfer to the frontend development field.

ROMAN HEALTH PHARMACY

Pharmacy Technician

New York
Sept. 2018 to Mar. 2020

- As a pharmacy technician in a fast-paced telehealth environment, I utilized my exceptional organizational and quality assurance abilities to ensure patients received accurate medications and outstanding service. This resulted in a significant boost in customer satisfaction, increasing the customer service score from 60% to over 75%.
- By diligently managing inventory and maintaining meticulous data entry practices, I consistently ensured optimal medication levels to meet patient demands. This attention to detail significantly enhanced delivery satisfaction, improving it by 30% and ensuring timely access to medications.
- In collaboration with the pharmacy team, I orchestrated seamless coordination and maximized productivity to efficiently process a high volume of online medication requests. Within a year, our script processing capacity increased from approximately 1,000 to a minimum of 4,000 scripts, demonstrating my ability to handle large workloads while prioritizing safety protocols for medication disposal and information security.
- My unwavering commitment to upholding healthcare regulations and protocols, coupled with my initiative to boost team morale through a daily round-out for script filing goals, cultivated a pristine work environment. As a result, productivity soared and team member satisfaction reached an impressive 85%, with team members expressing happiness working in the pharmacy team.
- This experience not only sharpened my technical accuracy, information management, and collaboration skills but also ingrained in me a strong sense of attention to detail, which is a valuable asset in any development team. I am eager to bring these qualities to a team that values delivering quality solutions. My pharmacy background has instilled in me the discipline and precision necessary for crafting intuitive user experiences, and I am ready to apply those skills in a development role.

GATEWAY COUNSELING CENTER

Training Specialist

New York
Apr. 2011 to Dec. 2017

- As a Training Specialist at a non-profit organization, I employed my curriculum development and technical skills to empower individuals with developmental disabilities. By creating customized learning plans tailored to each individual's unique needs and abilities, I achieved an average increase in subject comprehension of 15% over a span of 6 months.
- Through my event planning expertise and effective collaboration with staff, I fostered an engaging social community that significantly improved attendance at group activities by 25%. This inclusive environment provided individuals with developmental disabilities the opportunity to participate in meaningful social interactions and develop their social skills.
- Leveraging my organizational proficiency, I implemented a digital database to store important care documents, resulting in a remarkable 50% increase in staff efficiency when accessing critical information. This streamlined process not only saved time but also enhanced the overall quality of care provided to the individuals in need.
- By promptly resolving daily technology issues, I minimized learning disruptions and ensured that individuals and team members had uninterrupted access to assistive devices throughout 100% of the service hours. This dedication to maintaining a reliable and accessible technological environment contributed to a seamless learning experience for the individuals I served.
- My unwavering patience and diligence towards the goal of improving social activity in public and fostering independence at home for the individuals under my guidance resulted in an impressive 80% satisfaction rate among parents and guardians. This positive feedback affirmed the impact of my efforts in enhancing the lives of those in my classroom.
- This experience not only showcased my ability to manage complex administrative and educational projects but also demonstrated my commitment to uplifting underserved community members. I am excited to bring this same passion and expertise in using technical tools to my next role, where I can design accessible user experiences that enrich people's lives and promote inclusivity.

ATRIA ASSISTED LIVING

Life Guidance Program Specialist

New York
Jan. 2016 to Aug. 2016

- As a Life Guidance Program Specialist in a specialized unit within an assisted living facility, I dedicated myself to optimizing engagement and care for seniors with Alzheimer's and dementia. Through the implementation of customized activities tailored to each individual's needs, I significantly improved their focus and participation by an impressive 30%.
- The targeted exercises I designed and facilitated had a profound impact on the residents' overall well-being. Over a span of 3 months, these exercises increased physical activity by 45% and provided essential mental stimulation, resulting in a notable improvement of 20%.
- Utilizing my strong conflict resolution skills, I effectively decreased incidents between residents by an impressive 55%, creating a more harmonious and welcoming community within the facility. This conducive environment supported the residents' comfort and security, enabling them to thrive in their daily lives.
- By sharing my expertise and training new staff members on proven engagement tactics, I not only increased hiring efficiency by 65% but also ensured consistent and individualized attention for the residents. This comprehensive training fostered a culture of compassionate care and reinforced the importance of personalized support for seniors with Alzheimer's and dementia.
- The relaxing events I thoughtfully organized on a monthly basis had a profound impact on the seniors' well-being. As a result, anxiety levels were reduced in an impressive 80% of the seniors, providing them with a sense of calm and tranquility.
- This experience exemplifies my skills in developing and implementing enrichment programs that uplift underserved groups and improve overall well-being. I am enthusiastic about applying this same passion and dedication to creating meaningful experiences through thoughtful design in my next role as a user experience developer.
